REPORT: - WORLD CANCER DAY – (04 February 2024)

Cancer is the second-leading cause of death worldwide. 10 million people die from cancer every year. More than 40% of cancer-related death could be preventable as they are linked to modifiable risk factors such as smoking, alcohol use, poor diet and physical inactivity.

The cancer awareness programs conducted in community and schools and. The programs were to educate to villager about cancer prevention, early detection, and available resources for support and treatment.

The Cancer Awareness Program conducted in under supervision of Mrs.Jacynth Dhaya Head of Community Health Nursing Department (HOD) and teachers, along with the cancer awareness rally and health education held in Jalgaon khurd , aimed to disseminate vital information about cancer prevention, early detection, and treatment. The program sought to utilize the influence of educators to educate students and the community at large about cancer-related issues.

Main objectives of this program is to educate students and community people about cancer, its risk factors, and preventive measures. Conduct a rally to raise community awareness about cancer and promote early detection practices. Foster collaboration among educational institutions, community leaders, and healthcare professionals to effectively address cancer-related issues.
